Subject: Glycols from Cement - NSF

Hello Dr. Orme-Zavaleta,

Attached is the data set we collected regarding glycols leaching from cement materials. A summary of the test protocol is in the word document and some excerpts from Standard 61 in the PDF. The excel doc contains the data for samples tested 2007 -2012 that produced a detection. I also summarized the total number of times we have run these analysis in the word document. That summary contextualizes the detection frequency for the products we test. But if you would like the entire data set, I can certainly send it along.

Please let me know if you have any questions and we can discuss those via email or via phone call. Whichever seems better suited to answer the question(s) the best.

Scott Randall
